

A photograph of a solar farm. In the foreground, there is a chain-link fence. Behind the fence, several solar panels are visible, mounted on a structure. In the background, there are utility poles with power lines, and a range of mountains under a blue sky with scattered white clouds. A green rectangular box with white text is overlaid on the left side of the image.

**The future is
created today.**

IRIS

The project produces significant novel research on the development of the Cuban energy system and its potential future development paths in local and global socio-economic, political, technological and environmental context. The project builds on previous research work of the partner institutions and other research organisations. The research work is linked to Erasmus+ CRECE project.

Location
Cuba

Total budget
996 514 €

Funded by
Academy of Finland

Duration
2019 – 2022
